digitanimal

Digitanimal EVO

GPS locator for sheeps

Track your livestock in the palm of your hand

Enjoy the **peace of mind**

With the digitanimal system, you can see at any time the route taken by your animals. Create your farms and enclosures in the app and set up alerts that will warn you in case an animal gets out. When their activity or temperature are abnormal you also get alerts.

Long battery life

From 6 months up to 2 years so you don't have to worry about anything

Increases Productivity

Save on fuel and time spent searching for your animals

Constant development

We work together with research centres and universities to improve day by day

Enjoy peace of mind

Animals status notifications sent to your phone anytime, anywhere

Full control of **your farm**

Virtual fencing

Draw 'safe areas' in your App and set up alerts that will warn you if an animal leaves or enters the enclosures

Localisation

Know the exact location of your livestock and their route over the last 24 hours anytime and anywhere in the world

Digitanimal EVO

GPS locator for sheeps

Make the most of **your data**

Activity tracking

Our device registers all the daily data of your livestock and sends you information about the animal's activity and health.

Location history

The locations store on our servers so that you can see which pastures are the best based on the grazing behaviour of your animals.

Design and **ergonomics**

Your livestock's best friend: small, resistant and above all, durable.

Shape of the device

It adjusts to your animals' necks without affecting their freedom of movement.

Dimensions and weight

A lightweight device of only **280 gr** and measures **10,6** x **7,7** x **5 cm**

FAQ

Will I have coverage in my area?

We use different technologies to reach the whole territory. Among them, the IoT **Sigfox** network, which increases the battery life, or multi-operator **GSM** mobile network. We can provide coverage in areas not covered by any of previous technologies by installing our **antennas**.

How long does the battery last?

With standard timing, up to 2 years with Sigfox and 6 months with GSM without changing the battery.

Is it difficult to mount the device?

It is very easy.
The device should be placed on the left-side of the animal's neck and with the letters facing forward. In the quick guide you will find how to access the app, but remember we're always at your service.

Is the device resistant?

It is specifically designed for cattle. It is ergonomic, lighter, sturdy and durable, and has obtained an IP68 certified.
